DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings have not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the figures.

Specification

3. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Election/Restrictions

4. *Applicant's election without traverse of Invention I (Claims 19, 21-25, 29, 31-33, 38, 61, 64, 66-70, 74, 76-78, and 83) in the reply filed on 3 February 2009 is acknowledged and appreciated.*

5. ***Claims 109, 111-115, 121-123, and 128 are withdrawn*** from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on *3 February 2009*.

6. This application contains claims directed to the following patentably distinct species:

Species 1, drawn to a first inventive embodiment wherein when a displayed object is pointed at, a commercial image is displayed
(*e.g., see page 57, lines 6-11 of the instant specification*).

Species 2, drawn to a second inventive embodiment wherein when a displayed object is pointed at, a voice advertisement is output
(*e.g., see page 57, lines 6-11 of the instant specification*).

Two above species are directed to the following patentably distinct sub-species:

Sub-Species A, drawn to the on-demand advertisement providing system architecture as illustrated in Figure 20

(e.g., see page 49, line 19 - page 50, line 26 of the instant specification).

Sub-Species B, drawn to the on-demand advertisement providing system architecture as illustrated in Figure 23

(e.g., see page 53, line 8 - page 54, line 19 of the instant specification).

Sub-Species C, drawn to the on-demand advertisement providing system architecture as illustrated in Figure 24

(e.g., see page 54, line 20 - page 55, line 22 of the instant specification).

Sub-Species D, drawn to the on-demand advertisement providing system architecture as illustrated in Figure 25

(e.g., see page 55, line 23 - page 57, line 5 of the instant specification).

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (*e.g., Species I-A*) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claims 77, 78, and 83 arguably appear to be generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (*e.g., searching different classes/subclasses or electronic resources, or employing different search queries*); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as

an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
